

Excellent wind turbine!

- 1. Unique design*
- 2. Unique technology*
- 3. Unique performance*

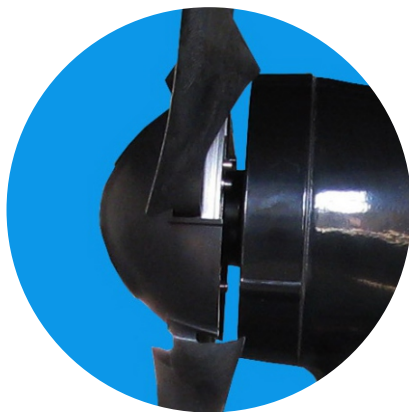

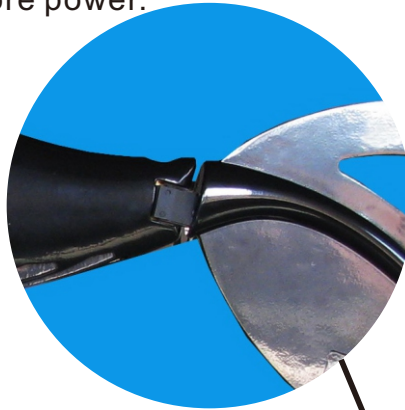

The Next Generation Wind Turbine!
Real nemo wind turbine, Swimming in the sky!

1. Unique design

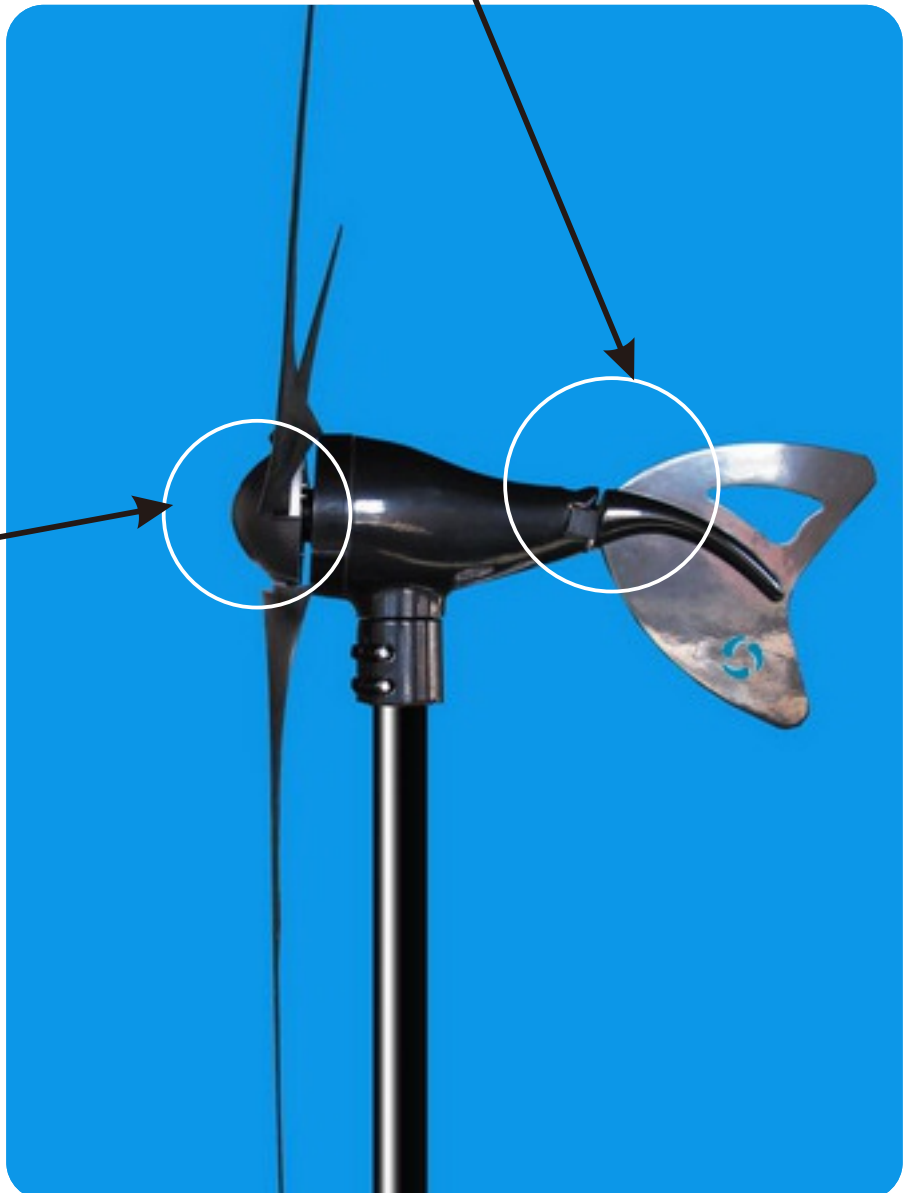

Perfect streamline design of body.

the shaking damping tail design can reduce strong wind shock, make sure the wind turbine can be working in the wind speed from 3m/s(6.7mph) to 20m/s(44.7mph), the wind turbine can output more power.

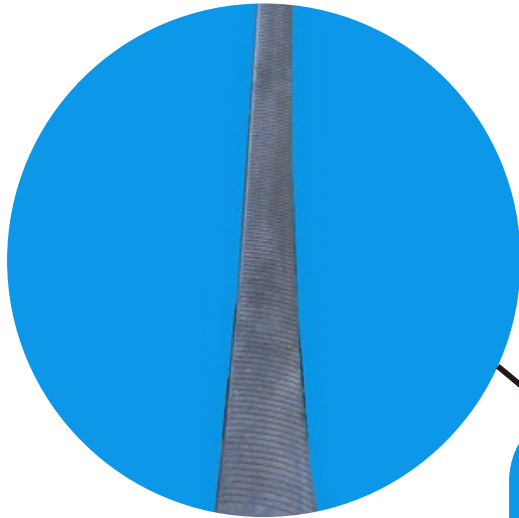

the shaking damping tail design

New fresh locking nose cone design, make sure nose cone will never take off.

2. Unique technology

Unique noise reduction design, compared with traditional the wind turbine blades, the noise level can drop about a half. (in the 12m/s wind speed, ten meters distance, the noise just 58dba)

3. Unique performance

high quality silicon steel sheet for alternator,
Improve the efficiency of the alternator
high efficiency blades design, make sure the same alternator
can output more power, about increase by 10% in same wind speed.
